Use of wharfs, or facilities, shall be deemed an acceptance of this tariff, and the terms and conditions, named herein. It is the responsibility of the user to be aware of the physical characteristics of the facilities.

(c) Rates Subject to Change

The rates named in this tariff are based upon ordinary traffic and labor conditions. If, and when, these conditions change because of demand of labor for increased wages, strikes, congestion, or other causes, not reasonably within the control of the Port of Anacortes, resulting in an increased cost of service, the rates are subject to change without notice or the charge for service may be assessed on the Man-Hour basis as provided for in Section 4.

(d) General Application of Rates

Unless specifically provided for otherwise, rates named in this tariff are in dollars per metric ton, per cubic meter, or 1000 Board Foot measure (Scribner), according to vessels manifest, or, lading covering shipment when not in connection with vessel.

(e) Specific Commodity Rates Prevail

Unless otherwise excepted, rates provided for specific commodities will prevail over N.O.S. rates or general commodity rates.

SECTION 2
COMMODITY RULES, EXPLANATIONS, AND RATES

Item #**WHARFAGE****Item # 23****(a) Wharfage Defined**

Wharfage is a charge assessed against either cargo, or vessel, on cargo passing or conveyed over, onto, or under wharfs, or between vessels (to/from the water, barge, or lighter) when berthed at a wharf or when moored in a slip adjacent to a wharf. Wharfage is the charge for use of a wharf and does not include charges for any other service. The tariff rate charged will be the rate in effect on the date cargo is received.

(b) Basis for Assessing Wharfage

Wharfage is considered earned and is assessed irrespective of whether the cargo is loaded to a vessel. Wharfage rates are based upon the commodity description and classification as described in the vessel manifest. Rates are per metric ton unless otherwise stated in individual tariff items. When the wharfage rate unit of measure is expressed in either cubic meters (C/M) or metric tons (M/T), the charge will be made on the unit of measure that is manifested by the vessel. However, if cargo is manifested on a unit basis, the wharfage will be billed on weight, or measurement, whichever creates the greater revenue.

(c) Wharfage Assessed Against Overside Vessel Operations

Cargo discharged, or loaded, overside a vessel directly to/from another vessel, barge, raft, or the water, while the vessel is berthed, or moored in a wharf slip, will be assessed wharfage at one-half the normal wharfage rates. This rule will not apply in cases when any other specific "overside" tariff rate is applicable.

(d) Exceptions

Ship's stores, repair materials, and supplies, when intended for a vessel's own use, will be exempt from assessment of wharfage unless Port of Anacortes employees are required to receive and account for such supplies, or stores, on the wharf.

(e) Dunnage, Lining Lumber, and Fuel

Dunnage for use in stowing cargo not loaded at Port of Anacortes' wharfs, lining lumber used in lining vessels for shipment of bulk commodities (as distinguished from dunnage lumber used in ordinary stowage), and fuel processed over the wharfs, are subject to wharfage and other appropriate charges.

SECTION 2
COMMODITY RULES, EXPLANATIONS, AND RATES

Item #**LOADING AND UNLOADING****Item # 24****(a) Loading and Unloading Defined**

Loading and Unloading are the respective charges for service performed in loading freight from wharf premises on, or into, trucks, or barges, and unloading freight from trucks, or barges onto wharf or premises. The services include ordinary breaking down, sorting, and stacking. Cranes used in connection with barge loading, or unloading, will be billed at actual cost. Loading and Unloading charges are assessed against the freight, except in cases where carriers absorb such charge.

(b) Wages Predicated on Straight Time Labor

Loading and Unloading rates are predicated upon the payment of labor for basic straight time wages and the performance of such services on days, or during hours, when the basic straight time scale is in effect. In addition to these rates, when it is required to perform services on days or during hours when under the working rules governing labor, the payment of penalty time, overtime, or penalty overtime wages is necessitated, all wage costs of labor incurred in excess of wage costs at basic straight time scale of pay for the number of hours such labor is engaged will be assessed in accordance with the Man-Hour Schedule in Section 4 of this tariff.

(c) Exception - Application of Man-Hour Rates on Loading and Unloading

When the service of Loading and Unloading of freight in containers or units of such unusual bulk, size, shape, or weight as to preclude performing services at specified or N.O.S. rates named, or when such services are delayed because of sorting, special checking, tallying, inspection, weighing, condition of freight, or other conditions or causes not ordinarily incidental to the services, the Port of Anacortes reserves the right to apply the Man-Hour Rates as named in this tariff on such services after notice has been made to shipper, consignee, and/or carrier involved.

SECTION 2
COMMODITY RULES, EXPLANATIONS, AND RATES

Item #**HANDLING****Item # 25****(a) Handling Defined**

Handling is the charge assessed for moving freight from the end of ship's tackle on the wharf to the first place of rest on the wharf, or from the first place of rest on the wharf to within reach of ship's tackle on the wharf. It includes ordinary sorting, breaking down, and stacking on wharf. (**Note:** Unless otherwise excepted, and when equipped, the Port of Anacortes will perform services of Handling).

(b) Rates Predicated on Straight Time Labor

Handling rates are predicated upon the payment to labor of basic straight time wages and the performance of such services on days, or during hours, when the basic straight time scale is in effect. In addition to these rates, when it is required to perform services on days or during hours when overtime, or penalty overtime wage is necessitated, all wage costs of labor incurred in excess of wage costs at basic straight time scale of pay for the number of hours such labor is engaged will be assessed against the vessel, its owner, agent, or operator, in accordance with applicable rates as shown in the Man-Hour Schedule in Section 4 of this tariff.

(c) Exception - Application of Man-Hour Rates on Handling

When the services of Handling of freight in containers or units of such unusual bulk, size, or weight as to preclude performing services as specified, or N.O.S. rates named, or when such services are delayed on account of sorting, special checking, tallying, inspection, weighing, condition of freight, or other conditions or causes not ordinarily incidental to the services, the Port of Anacortes reserves the right to apply applicable Man-Hour Rates as named in this tariff on such service.
